## Honeywell Home Pressure Reducing Valves

# **D15SN**

## Diaphragm-actuated pressure reducing valve

with cartridge insert, low pressure pattern

## **APPLICATION**

According EN 806-2 pressure reducing valves of this type protect household water installations against excessive pressure from the supply. They can also be used for industrial or commercial applications within the range of their specification.

By installing a pressure reducing valve, pressurisation damage is avoided and water consumption is reduced.

The set pressure is also maintained constant, even when there is wide inlet pressure fluctuation.

Reduction of the operating pressure and maintaining it at a constant level minimizes flow noise in the installation.

## **APPROVALS**

• WRAS (up to 23 °C)

### **SPECIAL FEATURES**

- Inlet pressure balancing no influence on outlet pressure by fluctuating inlet pressure
- Patented cartridge solution for easy assembly and maintenance
- Two cartridge insert fits all nominal widths, making warehousing efficient
- High corrosion resistance due to stainless steel cartridge and PA coating
- The adjustment spring is not in contact with the drinking water
- With inlet and outlet pressure gauge
- Functionality and performance have been confirmed by an accelerated life test with over 400.000 cycles (requirement acc. to EN 1567: 200.000 cycles)
- Lead content of all materials is below permissible limits specified by DIN 50930-6
- All materials are UBA conform
- ACS certified
- All materials WRAS approved

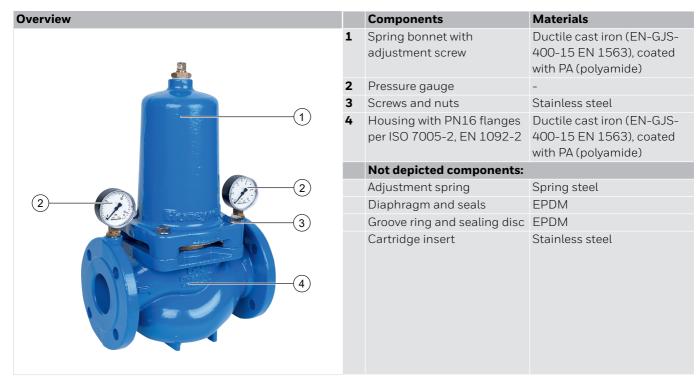

## **TECHNICAL DATA**

| Media                      |                |
|----------------------------|----------------|
| Medium:                    | Drinking water |
| Connections/Sizes          |                |
| Connection sizes:          | 2"- 4"         |
| Nominal sizes:             | DN50 - DN100   |
| Pressure values            |                |
| Max. inlet pressure:       | 16 bar         |
| Outlet pressure:           | 0.5 - 2 bar    |
| Nominal pressure:          | PN 16          |
| Min. pressure drop:        | 1 bar          |

| Max. operating temperature | 30 °C          |
| medium accord. to EN 1567: |                |
|                            |                |

## CONSTRUCTION

## **METHOD OF OPERATION**

Spring loaded pressure reducing valves operate by means of a force equalising system. The force of a diaphragm operates against the force of an adjustment spring. If the outlet pressure and therefore diaphragm force fall because water is drawn, the then greater force of the spring causes the valve to open. The outlet pressure then increases until the forces between the diaphragm and the spring are equal again.

The inlet pressure has no influence in either opening or closing of the valve. Because of this, inlet pressure fluctuation does not influence the outlet pressure, thus providing inlet pressure balancing.

## TRANSPORTATION AND STORAGE

Keep parts in their original packaging and unpack them shortly before use.

The following parameters apply during transportation and storage:

| Parameter                       | Value                    |
|---------------------------------|--------------------------|
| Environment:                    | clean, dry and dust free |
| Min. ambient temperature:       | 5°C                      |
| Max. ambient temperature:       | 55 °C                    |
| Min. ambient relative humidity: | 25 % *                   |
| Max. ambient relative humidity: | 85 % *                   |

## **INSTALLATION GUIDELINES**

#### Setup requirements

- Install in horizontal pipework with spring bonnet directed upwards
- Installation in vertical pipework possible with increased maintenance effort
- Install shut-off valves
- The installation location should be protected against frost and be easily accessible
  - Pressure gauge can be read off easily
  - Simplified maintenance and cleaning
- Install downstream of the filter or strainer
  - This position ensures optimum protection for the pressure reducing valve against dirt
- Provide a straight section of pipework of at least five times the nominal valve size after the pressure reducing valve (in accordance with EN 806-2)
- Requires regular maintenance in accordance with EN 806-5

## **Installation Example**

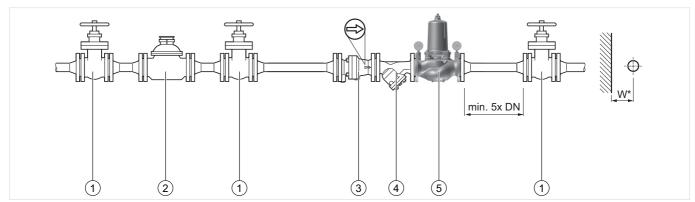

Fig. 1 Standard installation example for the pressure reducing valve

- 1 Shut-off valve
- 2 Water meter
- 3 Non return valve
- 4 Strainer
- 5 Pressure reducing valve

| Connection sizes:    |     |        |     |     |
|----------------------|-----|--------|-----|-----|
| DN                   | 50  | 65     | 80  | 100 |
| inch                 | 2"  | 2 1/2" | 3"  | 4"  |
| Distance in mm (W*): | 110 | 120    | 130 | 145 |

<sup>\*</sup> Required installation distances between the centerline of the pipework and the surrounding in dependency of the connection size.

## **TECHNICAL CHARACTERISTICS**

## kvs-Values

| Connection sizes:                           |    |        |    |     |
|---|----|--------|----|-----|
| DN  | 50 | 65     | 80 | 100 |
| Inch  | 2" | 2 1/2" | 3" | 4"  |
| k <sub>vs</sub> -value (m <sup>3</sup> /h): | 18 | 49     | 51 | 56  |

## Pressure drop characteristics

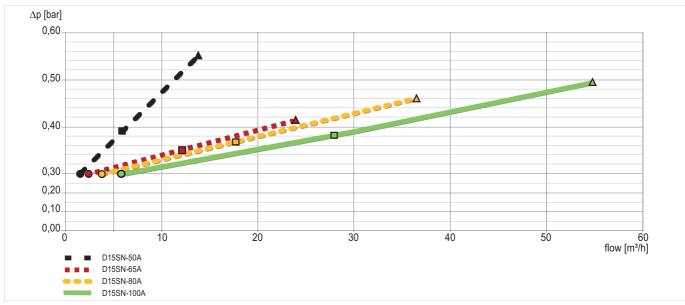

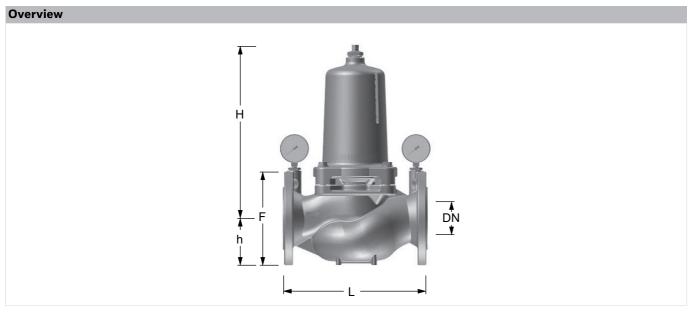

Fig. 2 Pressure drop within the valve in dependency of the flow rate and the used connection size (Sizes 50-100). Pressure setting: P1: 8bar, P2: 2bar

|                                     | DN50                  | DN65                  | DN80                  | DN100                 |
|-------------------------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| • $\triangleq$ 10% of standard flow | 1.4 m <sup>3</sup> /h | 2.4 m <sup>3</sup> /h | 3.6 m <sup>3</sup> /h | 5.6 m <sup>3</sup> /h |
| ≙ 1m/s flow rate                    | 7 m <sup>3</sup> /h   | 12 m <sup>3</sup> /h  | 18 m <sup>3</sup> /h  | 28 m <sup>3</sup> /h  |
| ▲  2m/s flow rate = QN              | 14 m <sup>3</sup> /h  | 24 m <sup>3</sup> /h  | 36 m <sup>3</sup> /h  | 56 m <sup>3</sup> /h  |
| Flow rate at 4m/s flow velocity     | 28 m <sup>3</sup> /h  | 48 m <sup>3</sup> /h  | 72 m <sup>3</sup> /h  | 112 m <sup>3</sup> /h |

## **DIMENSIONS**

| Parameter              |      |     | Values |     |      |
|------------------------|------|-----|--------|-----|------|
| Connection sizes:      | Inch | 2"  | 2 1/2" | 3"  | 4"   |
| Nominal size diameter: | DN   | 50  | 65     | 80  | 100  |
| Weight:                | kg   | 14  | 30.5   | 32  | 34.5 |
| Dimensions:            | L    | 230 | 290    | 310 | 350  |
|                        | Н    | 296 | 370    | 370 | 370  |
|                        | h    | 83  | 93     | 100 | 110  |
|                        | F    | 165 | 185    | 200 | 220  |

Note: All dimensions in mm unless stated otherwise.

## **ORDERING INFORMATION**

The following tables contain all the information you need to make an order of an item of your choice. When ordering, please always state the type, the ordering or the part number.

## **Options**

The valve is available in the following sizes: 2'',  $2^1/2''$ , 3'' and 4''.

- standard
- not available

|          |   | D15SNA |
|----------|---|--------|
| Flanges: | PN16, ISO 7005-2, EN 1092-2, face to face length acc. EN 558-1        | •      |
| Housing: | Ductile cast iron (EN-GJS-400-15 EN 1563), coated with PA (polyamide) | •      |

Note: ... = space holder for connection size

Note: Ordering number example for  $2^{1}/2^{"}$  and type A valve: D15SN-21/2A

## **Spare Parts**
